

TECHNOLOGIES FOR A BETTER TOMORROW

A CSR Bulletin by IIT Madras

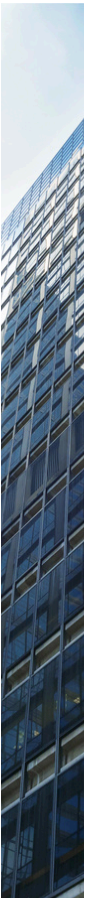

IIT MADRAS – A RICH LEGACY OF TECHNOLOGY-DRIVEN SOCIAL IMPACT

IIT Madras has had a long history of pioneering various technology-driven social impact initiatives in the country.

From being the global leader in the 80's in setting up the world's first power plant that converted wave energy into electrical energy using OWC technology at Trivandrum, Kerala, to replacing the wooden sleepers in Indian Railways with pre-stressed concrete sleepers, IIT Madras, through the decades, continues to create and deploy cutting-edge technologies that are redefining realities for multitudes, be it under CSR, research, or through Government and industry collaborations.*

IITM has partnered with 180+ leading corporate entities, deploying technology-driven CSR projects worth 240+ crores across socially relevant themes ranging from energy to education, agriculture to artificial intelligence, water to waste management, health to housing, and centers of excellence to community development, among others.

We trust this newsletter will give you a glimpse into our CSR initiatives and insights. We invite you to explore synergies with us. Let our technologies transform your CSR from 'teaching a man to fish', to 'developing a fishing technology' that will feed a community. Write to us today at csrpartner@ia.iitm.ac.in

CSR IMPACT: THE BS ONLINE PROGRAM OF IITM

REVOLUTIONIZING SKILLING IN INDIA

The World's first BS Online Program in Data Sciences is democratizing high-quality IIT education and powering high-impact CSR Skilling and Education Projects across India.

Click here to explore collaborating under CSR

About the Program

The (literally!) burning issue of paddy waste.. now has a 'waste-to-wealth' solution!

FROM STUBBLE TO SUPERCAPACITORS

This powerful eco-friendly technology developed at IIT Madras, has successfully converted kitchen waste and other organic waste, into activated carbon.

The final output would become an additional source of income for farmers – improving the economy, environment, health, livelihoods and women empowerment.

The initiative invites CSR funding, to translate the technology to paddy waste and for scalability assessments thereafter. If you are interested, do get in touch with us.
